Elvio Santangelo

About me

I am a passionate *Game Developer* with a multidisciplinary profile, but with a particular focus on gameplay programming, level design, artificial intelligence and build automation systems.
I am deeply committed to contributing at a high level in the game development field.
I approach every problem expecting to find a solution.

Personal information

Citizenship: Italian
Languages: Italian (native), **English (fluent)**

Skills

- **Programming languages:** Bash, Batch, C, C++, C, JavaScript, OpenCL, Python, TypeScript,
- **Technologies:** Blender, Docker, Git, Git-LFS, Godot, Hammer editor, HTML/CSS, Jira, JetBrains Suite, Linux, Node.js, Source Engine, Steamworks SDK, Unreal Engine 5, VS, VSCode.
- **Miscellaneous:** Strong problem-solving skills, effective team collaboration and high self-organisation in remote work environments.

Professional experience

C++ Software Engineer, Gameplay Programmer, Level Designer
at *Bevium SRL* **Feb 2024 – Nov 2025**

◇ Gameplay Programmer in C++, using Unreal Engine 5, with a generalist approach to video game development. Responsible for implementing AI behaviour in professional projects, creating internal systems in C++ and designer-oriented Blueprint Systems.

◇ In-depth knowledge of the UE5 Reflection system, replication, multiplayer game development and the Gameplay Framework.

◇ Expertise with custom build systems and pipelines with **UBT** and **UAT**.

◇ Management of internal project planning and task tracking; led the on-boarding, training and mentoring of newly hired developers.

Education

Master's Degree in Computer Science
University of Catania. **Oct 2023 – Present**

Bachelor's Degree in Computer Science.
University of Catania. **Oct 2017 – Apr 2023**

Projects

Arcas Champions ◇ Competitive third-person multiplayer shooter; implementation of AI agents for players and enemies, core systems in C++ and Blueprint, and custom build pipelines with **UBT/UAT**.
led level design from grayboxing to final polish.
Managed Kanban workflows and versioning with Git.
Handled UE5 build from source and migration from various versions
Managed the game's distribution on **Steamworks**.

Bevium SRL **Feb 2024 – August 2025**

LIS Project, CNN Model ◇
I implemented a CNN model to recognise the alphabet of Italian Sign Language (LIS), designing custom and AlexNet-based architectures, training them on MNIST and ad hoc acquired datasets, and building a data acquisition and engineering pipeline.
University of Catania **July 2024**

Interloping Habitat - Black Mesa Mod ◇
I created a complete level mod on Source Engine from grayboxing to final polish, designing the layouts and the overall experience, as well as the new functionalities present in the Black Mesa engine branch.
Personal project **July 2021**

Hobbies

Hiking, weightlifting, kickboxing, reading, chess, travelling
