👤 ABOUT ME

I am a **C++ Unreal Engine 5 Gameplay / Generalist Programmer** who likes working close to the actual game: gameplay feel, AI behaviour, multiplayer systems, level flow, debugging and designer-facing tools.

I have a **generalist profile** and I am comfortable moving between gameplay code, build workflows and practical production problems.

I work best in small teams where programmers are expected **to take ownership, communicate clearly** and turn messy problems into usable systems.

📁 PROFESSIONAL EXPERIENCE

DevOps Engineer Intern - Unreal Engine Tooling

06/2026 – Present

Stormind Games 🔗

Catania

Working on internal tooling and automation around Unreal Engine production workflows, CI/CD and build pipeline support and reliability.

Contributing to Jenkins/Discord build notification tooling, CLI parsing and developer workflow improvements for Unreal Engine projects.

Unreal Engine 5 C++ Gameplay / Generalist Programmer, Level Designer

02/2024 – 11/2025

Bevium SRL

Full Remote

Gameplay Programmer in C++, using Unreal Engine 5, with a generalist approach to video game development.

In-depth knowledge of the UE5 Reflection system, replication, multiplayer game development and the Gameplay Framework.

Management of internal project planning and task tracking; contributed to onboarding, training and mentoring newly hired developers.

🎓 EDUCATION

Master's Degree in Computer Science

10/2023 – Present

University of Catania

Bachelor's Degree in Computer Science

10/2017 – 04/2023

University of Catania

🧠 SKILLS

Core Skills: Unreal Engine 5, Gameplay Framework, AI Behaviour, Multiplayer, Replication, Blueprint Integration, Debugging, Level Design

Programming languages: Bash, Batch, C, C++, C#, JavaScript, OpenCL, Python, TypeScript

Technologies: Blender, Docker, Git, Git-LFS, Godot, Hammer editor, HTML/CSS, Jenkins, Jira, JetBrains Suite, Linux, Node.js, Source Engine, Steamworks SDK, Unreal Engine 5, Visual Studio, VSCode

Miscellaneous: Strong problem-solving skills, effective team collaboration, high self-organisation in remote work environments and quick to onboard.

🔍 PROJECTS

Arcas Champions

02/2024 – 08/2025

Bevium SRL

Competitive third-person multiplayer shooter; implementation of AI systems for players and enemies, core systems in C++ and designer-facing Blueprint systems.

Led level design from grayboxing to final polish in coordination with the art team.

Managed the game's distribution on Steamworks on release.

Interloping Habitat - Black Mesa Mod

07/2021

Personal project

I created a feature complete level mod on Source Engine from grayboxing to final polish, designing the layouts and the overall player experience, as well as the new functionalities present in the Black Mesa engine branch.
